- Loads Workbook data into work queue

Action Properties Box Example

- ▶ Work Queues Action Box
 - ▶ Page 2
- ▶ Assigns parameters for action tasks

The screenshot shows the 'Action Properties' dialog box for the 'Work Queues' action. The 'Name' field is set to 'Work Queues'. The 'Description' field contains the text: 'The Data collection contains the items to be added to the queue. The collection may contain single or multiple rows, with each representing an item to be added.' The 'Business Object' is set to 'Work Queues' and the 'Action' is set to 'Add To Queue'.

The 'Inputs' tab is selected, showing a table with the following columns: Name, Data Type, and Value.

Name	Data Type	Value
Queue Name	Text	[Work Queue Name]
Data	Collection	[Data]
Defer Until	DateTime	
Priority	Number	
Tags	Text	
Status	Text	
Batch Size	Number	

The 'Batch Size' field has a calculator icon next to it. The 'Outputs' and 'Conditions' tabs are also visible.

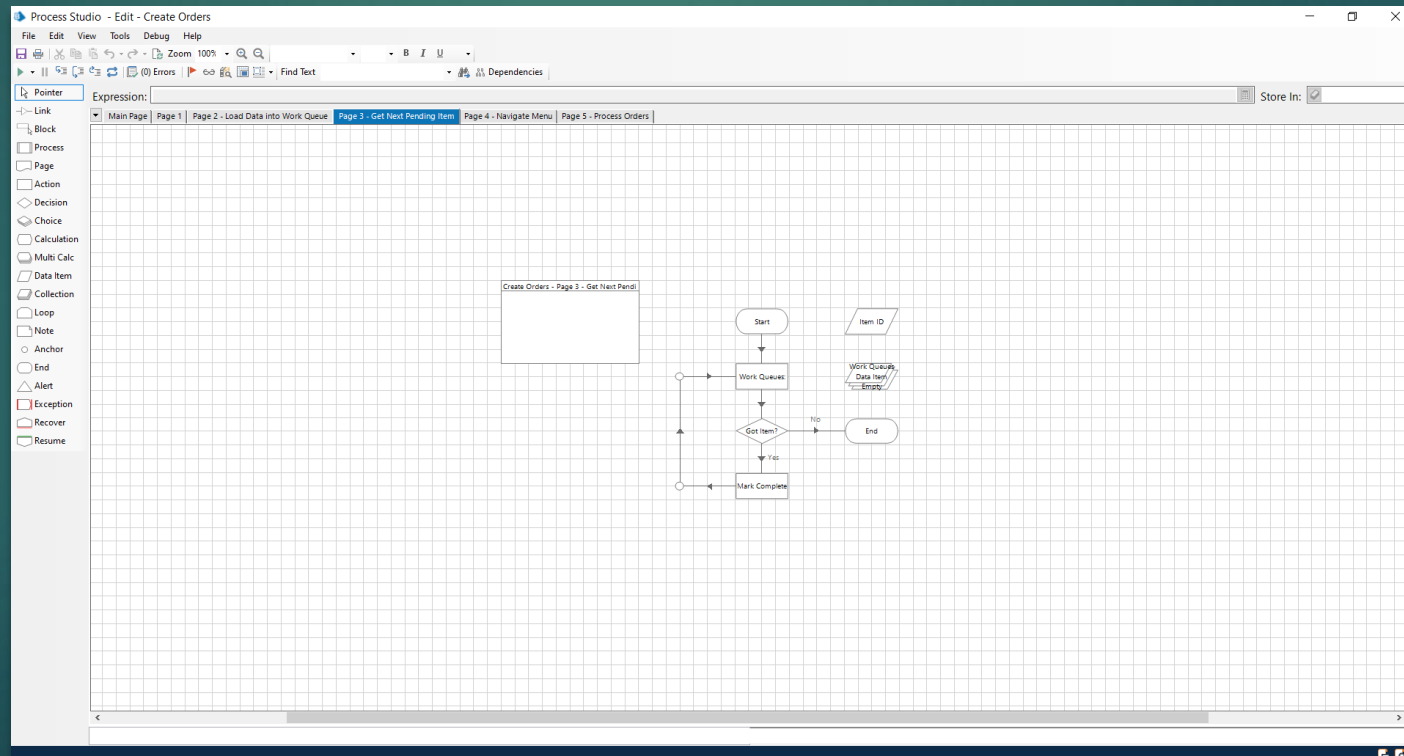

On the right side, the 'Group' section has checkboxes for 'Page', 'Data Type', and 'View All Items'. Below this is a tree view showing the action's structure:

 - DateTimes
 - Flags
 - Images
 - Numbers
 - Passwords
 - Text
 - Work Queue Name
 - Times
 - TimeSpans
- Page 3 - Get Next Pending Item
- Page 5 - Process Orders

At the bottom, the 'Stage logging' section has a dropdown set to 'Errors only' and a checkbox for 'Don't log parameters on this stage'. The 'Warning threshold' is set to 'System Default' with a dropdown, and a numeric field for 'Number of minutes' set to 5, with a note '(0 to disable)'. 'OK' and 'Cancel' buttons are at the bottom right.
